GTC Nutrition Expands Ingredients Portfolio with the Addition of BioAgave™
Agave Active Fiber Complements Digestive Health Offerings

GOLDEN, Colo. (June 30, 2008) – GTC Nutrition, a business unit of Corn Products International, Inc., today announced the addition of a new fiber ingredient to its portfolio – BioAgave™ agave active fiber. BioAgave complements the company's nutrition-based digestive health solutions.

BioAgave™ agave active fiber is a plant-derived source of inulin that provides unique functional benefits to food and beverage applications. BioAgave features a branched structure and high degree of polymerization (DP). As a result, it offers unique functionalities and superior stability, particularly in liquid form. Derived from the Blue Weber agave plant in Mexico, BioAgave contains 90 percent inulin.

“This addition to our ingredient portfolio complements our digestive health offerings and allows us to provide a variety of fiber sources as well as unique fiber blends to address top consumer health concerns,” said Patrick Smith, president of GTC Nutrition. “The launch of BioAgave is a collaborative effort between two Corn Products International affiliates – GTC Nutrition and CPIngredientes in Mexico.”

BioAgave™ agave active fiber may be of particular interest to food and beverage manufacturers because many consumers fail to eat enough fiber. The Institute of Medicine recommends between 28-35 grams of fiber per day for adults in the U.S., yet most consumers only eat about 14-15 grams per day. BioAgave provides food and beverage manufacturers with a naturally-occurring source of fiber to increase the fiber content of better-for-you alternatives.

GTC Nutrition plans to market BioAgave™ agave active fiber as a wellness solution, focusing initially on markets in North America and Mexico. GTC Nutrition's ingredients portfolio supports bone, digestive, immune, heart and glycemic health, and expands beyond BioAgave to also include NutraFlora® scFOS® prebiotic fiber, Aquamin® calcified mineral source, OatVantage™ oat bran concentrate and NutraFlora Plus™ Hi-maize® prebiotic fiber blend.
