**GTC Nutrition Introduces FortiFeed® Prebiotic Fiber Line Extension**  
***FortiFeedFLO™ Improves Product Flowability in Animal Feed and Pet Food Processing***

GOLDEN, Colo. (October 17, 2007) – GTC Nutrition recently introduced FortiFeedFLO™ prebiotic fiber blend, a line extension of FortiFeed® short-chain fructooligosaccharides (scFOS®) prebiotic fiber, to improve handling in animal feed and pet food processing.

FortiFeedFLO offers the same health and functional benefits manufacturers have come to expect with FortiFeed, including helping to support digestive and immune health and outstanding solubility and dispersion.

“We are continually looking to improve and expand our ingredient offerings to the animal industry to meet growing demand for more natural feeds and pet foods,” said Bart Dunsford, Ph.D., PAS, senior account manager of animal nutrition for GTC Nutrition. “FortiFeedFLO allows us to provide our customers with one of the most efficacious prebiotic soluble fibers on the market, and presents options to best meet individual customer processing needs.”

GTC Nutrition manufactures, distributes and markets FortiFeedFLO throughout North America, South America, Australia and New Zealand. Both FortiFeed and FortiFeedFLO are ideally suited for all animal production, poultry, aquaculture and companion animal applications. For more information, visit [www.fortifeed.com](http://www.fortifeed.com).
