**GTC Nutrition to Showcase New Value-Added Ingredients at the 2009 IFT Food Expo**  
*Better-for-You Prototypes Support Bone, Cognitive, Digestive, Heart and Immune Health*

GOLDEN, Colo. (April 30, 2009) – GTC Nutrition, a business unit of Corn Products International, Inc., will showcase two new value-added ingredient solutions at booth number 2323 at the 2009 Institute of Food Technologists (IFT) annual food expo June 7-9, 2009 in Anaheim, CA.

The two new ingredients to be featured include:

**Purimune™ high purity GOS** – 90% GOS – is available in powder form and delivers numerous benefits to manufacturers. As a prebiotic, Purimune supports immune health by promoting the growth of beneficial bacteria, while also helping to prevent the colonization of pathogenic bacteria, which helps to reinforce the body's natural defenses.

**Nu-Mega® Omega-3 DHA** microencapsulated ingredients include ThermoMAX®, which has been formulated to tolerate baking temperatures, and Driphorm®, suitable for a wide variety of applications. Fortification with Nu-Mega allows food processors to enrich everyday foods with Omega-3 DHA to support cognitive function, heart health and visual acuity with no impact on flavor. Nu-Mega ingredients are available in both oil and powder forms.

“At GTC Nutrition, we partner with our manufacturing customers to address top consumer concerns in the areas of bone, cognitive, digestive, heart and immune health,” said Coni Francis, Ph.D., R.D., senior manager of scientific and government affairs for GTC Nutrition. “IFT is an ideal venue for us to showcase our ability to naturally fortify a wide array of food, beverage and supplement products with our innovative ingredients.”

2009 GTC Nutrition IFT prototype features include:

**Immune Health** – Purimune™ high purity GOS fortifies a passion fruit/green tea icy beverage to encourage the growth of beneficial bacteria to support immune health.

**Heart & Cognitive Health** – Nu-Mega® Omega-3 DHA enriches a fruit-flavored chew to provide benefits for cognitive function, heart health and visual acuity.

**Bone Health** – Aquamin® calcified mineral source and NutraFlora® prebiotic fiber enrich a piña colada icy beverage to provide a good source of calcium along with scFOS® prebiotic fiber to increase mineral absorption.

**Digestive Health** – NutraFlora® prebiotic fiber and BioAgave™ inulin fiber provide a good source of fiber in a mango peach icy beverage to support digestive health.

In addition, GTC Nutrition will be presenting a symposium on Galactooligosaccharides: From Mother's Milk to Mainstream Foods on Sunday, June 7 from 1:30-3:00 p.m. and a poster on BioAgave™ inulin fiber also on Sunday from 3-5 p.m.
